

Rajan Extrusion Technique

ABA Blown Film Machine

The **ABA Blown Film Machine** is an innovative machine that produces triple-layer films with the ability to use recycled material or filler in the middle layer, reducing production costs while maintaining high quality.

Features:

- ✓ Triple-layer co-extrusion system
- ✓ Improved tensile strength
- ✓ Compatible with recycled material
- ✓ High production efficiency

Applications:

- ✓ Heavy-duty packaging
- ✓ Stretch films
- ✓ Shrink wraps

Model	Screw Dia (mm)	Main Motor	Roll Size	Layflat Width	Film Thickness(Microns)	Max Output (Kg/Hrs)	Connecting Load	Plant Dimension
